Lagoon.

There is plenty that is sensational this season at the Lagoon Park opposite Cincinnati on the Kentucky side of the river. With Kreisher, the famous balloonist, making ascensions and giving fireworks displays one mile in the air on Wednesday, Saturday and Sunday nights and at 4:30 p. m. on Monday, Tuesday, Thursday and Friday. With both afternoon and night ascensions on the 4th of July and the Motordrome Cycle races every Wednesday, Saturday and Sunday when the dare devils ride the saucer track at 90 miles an hour.

Then there is boating, fishing, dancing and in all one hundred amusements, which really covers all the pleasures of land and water. adv

"As time flies by there is no limit to which customs may change."

"No limit, whatever. Do you know that in my time I can remember when the average debutante was ashamed to let it be known that her grandmother used tobacco."—St. Louis Republican.

The Supremacy of Verse.

Gray's "Elegy" was not much esteemed by its author, who in one of his letters said that "the public would have received it as well had it been written in prose." The poet was a poor critic, for the third line of the first stanza achieves the supremacy of verse. There can scarcely be another to equal it in English literature. "The plowman homeward plods his weary way." Now, that line is such a supreme verse that you may recite it this way and that and it is still as good as ever:

The weary plowman homeward plods his way.

Homeward the weary plowman plods his way.

Weary, the plowman homeward plods his way.

The plowman, weary, plods his homeward way.

Homeward the plowman plods his weary way.

The plowman plods his weary homeward way.

And so on. But if it is not poetry it is the supremacy of verse.—London Chronicle.

The Split Log Drag.

The split log is due to the ingenuity of a Missouri farmer, who, to improve the condition of the highway between his farm and the neighboring village, devised a rude contrivance to smooth the rough places and round up the surface from the ditch to the center so as to drain off the water. This device was most simple since it consisted of a log split into two equal parts, with a few braces between them and a chain by which the horses hauled the drag. It was tried after a rain when the road was soft, and it worked so well that its fame soon traveled far and wide. This was the beginning of the split log drag, the improved form of which any farmer can make in a short time. It has revolutionized the work of maintaining dirt roads, work which had always been expensive and ineffective.—Harper's Weekly.

Fried Salt Herring.

When Kipling wrote about east and west never meeting he might, with almost equal truth, have made it north and south. England and Scotland have their own national ideas, particularly about cookery, and they won't mix. North of the Tweed it is rare in the extreme to find a man or woman who will eat eels, and south of it haggis has never succeeded in making itself a popular dish. Then there is salt herring. I heard lately of an English lady resident in Glasgow who went home to London on a holiday, taking with her, as a distinctive Scottish delicacy, a keg of Loch Fyne herring. To please her the Londoners tried to eat them, boiled, as they ought to be. But it was no good. They wouldn't go down. So after that they had them fried, and I understand the keg was finished.—Glasgow News.

Where the Apostles Fished.

The abundance of fish in the sea of Galilee is to this day the wonder of travelers. Most of the fishing done by the Syrians involves the use of nets probably identical in construction with those of the apostles, and the best evidence of the fishing having through the centuries been done with nets is to be found in the ease with which most of the fish may be derived with the help of any bait, natural or artificial. The pellucid water of this beautiful lake, with its ever changing reflections, is in striking contrast with the muddy depths of the Jordan, but the silt in that river, however unsightly to the eye, does not seem to inconvenience its fish, which are extraordinarily plentiful even in the lower reaches before it falls into that deathly lake which the Arabs call the sea of Lot.—London Outlook.

Michelangelo.

Michelangelo stood in the front rank both as painter and sculptor. In both arts he was worthy of the highest praise. The fresco of the "Last Judgment" in the Sistine chapel is considered the most wonderful picture in the world, showing the omnipotence of artistic science and the fiery daring of conception that but few other paintings can even approximate. In sculpture the "Moses" and the "Slaves," not to mention other pieces, rank among the finest creations of the art and proclaim Michelangelo to have been as masterful with his chisel as he was with his brush.—New York American.

The Scot Caddie.

Of the Scot caddie's contempt for lesser callings than the golfer's there are many examples. A professor—not Putter, but a Scot of equal eminence—was making a very poor show on the green. The caddie eyed him loftily and then sighed. "Aye, aye, professor, ye may be verra fine at the mathematics, but it takes a man o' genuine abeillity tae be a gowfer!"—Windsor Magazine.

A Girlish Scheme.

"Your daughter plays some very robust pieces." "She's got a bean in the parlor," growled Pa Wombat, "and that loud music is to drown the sound of her mother washing the dishes."—Exchange.

Respect.

Teacher—Elmer, you may define the word "respect." Little Elmer—It's the feeling one kid has for another what can lick him.—Chicago News.

Nobody knows what was the first thing Adam said to Eve, but the chances are she spoke first.—Charleson News and Courier.
